GET THE FACTS
COVID-19, Flu, and RSV in Children

More than **15 million children** have tested positive for COVID-19 since the pandemic outset. But COVID-19 isn't the only respiratory virus we need to look out for.

COVID-19

- Children represent **1 in 6 cases**
- Caused more than **800 child deaths** since pandemic onset

FLU

- Causes about **20,000 hospitalizations** in children each year
- Caused about **100 child deaths** last year

RSV

- More than **2 million infections** in children each year
- Causes about **100-300 child deaths** each year

FACT
## Vaccines protect young children against severe respiratory infections.

Unvaccinated children are at **higher risk** for severe illness and death

27M More than **10 million** children 5-11 years old and more than **17 million** children 12-17 years old have already received COVID-19 vaccines.

Vaccines can prevent **7 in 10** COVID-19 hospitalizations.
